Brachard Voices Hie Suspicion.

RACHARD moved about awk wardly to allow the others to pass him und leave the drawing room. Anne-Marle walked to a divan and sented heraelf, completely indifferent to his presence. Annia-Marie looked very hasntiful as

she ant there on the divan, coldly obus. Brachard thought ha had naver raalized until now the full intensity of his love for her. For many months no word of love had passed hetween them. When he released her, as much as pos sible, from the bondage of their marriage, after he came to know how littia she liked him, it was agreed be tween them that she should be free also from the useless repetition of his protestations of love. His woolng of his wife had been carried on allently, under that agreement, and he had won her to a sort of tolerant kindness nothing more. Now, that he was going sway from her for the first time, he felt the keenest sorrow

"I mustn't make you late," ahe said. "I hope your trip"-

Ruehes Photo Over Wire,

March 2.-Edouard Itelin, a French inventor, has succeeded in telegraphing a photograph from Bordeanx to t'arls in the record time of four nilmites.

M. Bellu's process differs radically from Korn's method. Instead of using selentum he prepares a photographic plate the hasis of which is bichromated gelatin and the surface of which is

uneven. A small metal point, rassing over the uneven surface of the pinte, causes a variation of the electric current, which renders possible the transmission over telegraph or telephone wire of the lights and shades of half tone plates and is attended with remarkable regularity and speed.

The most interesting feature of M. Itelin's invention is that it is possible, to carry about a small apparatus weighing about sixteen pounds and immediately attach it at any telephone station. This renders possible the telephontng of pictures over long distances.

IT'S HARD ON THE SOIL.

Removal of the Corn Stovar Takes Awey Much Valuable Plant Food.

Farniers often ask what effect the emoval of eorn stover has on the fertilly of the land. It has been dem onstrated that a ton of corn stover-that in, slaks without ears-contains six teen pounds of nitrogen, two pounds of phosphorus and seventeen pounds of potassium. Figure a grain rrop of fifty bushels and a stover yield of two and a half tons per acre. From this crope the stover removes nearly as much nitrogea and a great deal more potas-sium from the soil than the grain

The average acre yield of cern sto ver contains about the same amount of nitrogen, half as much phosphorus and four times as much potassium as the average oats grain yield of fifty lushels per acre or wheat at twenty-tive bushels per acre. Corn stover when removed from the land dees depiete the soll materially.

Cornstalks have much humus value. no that no one can tell just the extent of the effect of removing corn stover. On sandy soll or heavy clay the bene tits are most noticeable; therefore the character of the soll must be taken lute account-Orange Judd Farmer.

THIRD GUSHER IN CANNEL CITY FIELD.

The third producer was drilled in the Cannel City field Moandy with every indication that it will eclipse either of the others in production. It shows a volumn of more than 1,500,000 feet of gas per day and a flow of oil variously estimated at from 600 to 1, 000 barrels per day. On account of the terrific pressure even an approximately correct estimate is hard to make, but the most conservative do not hesitate to say that it a much better well than either the 'Gray Eagle" or the Terrill No. 1, and

that is admitting a great deal. Great excitement prevails at Cannel City and all kinds of rumors are afloat in regard to deals that are being negotiated and the prices offered for territory

adjacent to these wells.
We have been empelled to throw some splendid letters into the waste basket recently because the writer failed to put their real name as their assumed. - West Liberty Courier.

Headache

is one of the common symp-toms of womanly trouble, and the cause has to be removed before you can rid yourself of it stirely. A medicine that merely kills pain, does not go to the seat of the trouble, and kill the nuse. What you need is a woman's medicine—one which acts directly, yet gently, on the womanly organs.
